

GreenTek ECO – 1 Gallon \$38.95

An all new organic multi-link polymer that increases root mass, depth, water retention, yield, and quality. Fungicide fights, blight, bacteria, surface spores, and fungus.

Product Information

- Our groundbreaking high technology product is an organic multi-link carbon polymer with earth friendly natural components.
- This organic multi-link polymer will increase root mass and depth, water retention, yield, quality and shelf life.
- ECO provides protection against nematodes, bacterial and fungal infections. It builds resistance to disease in plants.
- Encapsulates nutrients and prevents nutrient loss due to leaching into soil.
- Eliminates phytophthora root rot and bud rot in palms and other trees. It is also documented by our customers that it has cured apple scab and rust on wheat.
- Certified organic by India Organic, LLC. and meets standards of the National Organic Program.
- Lawn Application 1 pint of ECO mixed with a minimum of 2 gallons of water per 1000 sq. foot. See label for additional application rates.
