

## Mineral Plex – 1 Gallon \$29.35

### Product Information

- A superior delivery system of chelated micronutrients for healthy soil. Increases energy, profits, yield, growth, quality, taste, shelf life, and nutrients. Organic components with high technology.
- A green high tech solution with proprietary chelated micronutrients obtained from natural components.
- Replenishes nutrients and values in plants and soils that are depleted by over farming, environmental conditions and chemical use.
- Organic chelation creates a superior delivery system that surpasses competitive products within the green industry.
- Replaces critical minerals resulting in increased energy, growth, yield, quality, shelf life, appeal, and taste.
- Increases profits for farmers, golf courses and nurseries while reducing green end user's cost.
- Designed for agriculture, commercial and residential applications.
- Application Rates: Spray 8-10 ounces of Mineral Plex per 1,000 – 2,000 sq. feet, mixed with a minimum of 2 gallons of water. See label for additional application rates.
